

Pioneering Drain Line Purity

JOB SPOTLIGHT

Job Name: Club Med Banquet Kitchen,
Port St. Lucie Florida

Courtesy Club Med, Sandiego Bay

Date Installed: December 2010

Product/Capacity: 3-GB-250 Grease Interceptors (3,750 gallon concrete equivalent)

Installing Contractor: Aqua Dimensions Plumbing, Tracy Howard

Local Jurisdiction: St. Lucie County

Details: Three GB-250's were installed in a loading bay, adjacent to an existing 3,000 gallon concrete interceptor previously installed under the loading bay. Both physical space, drop through the interceptors in order to reach the sewer, and the ability to have different riser heights and angles on each manhole all made Schier's Great Basin grease interceptors the perfect choice.
