

SIZING GREASE INTERCEPTORS

Common Concrete to Schier Grease Interceptor Crossovers

750 Concrete
Stores Approx 750 pounds

SCHIER GB-75
Certified to store 861 pounds

1,250 Concrete
Stores Approx 1,250 pounds

SCHIER GB-250
Certified to store 1,895 pounds

1,500 Concrete
Stores Approx 1,500 pounds

SCHIER GB-500
Certified to store 3,271 pounds

SCHIER GB-1000
Certified to store 5,495 pounds
compare to 3,000 Gallons Concrete

SCHIER GB-1500
Certified to store 10,061 pounds
compare to 6,000 Gallons Concrete

How do you compare/crossover between the two different types of grease interceptors? For hydromechanical grease interceptors, their efficiency, maximum flow-rate and grease storage capacity is known and verified by third-party lab testing. Non-certified (gravity) grease interceptors are not certified or tested. Their estimated grease storage capacity is calculated using the 25% Rule for grease interceptors
